Moldings

Flush Stair Nose

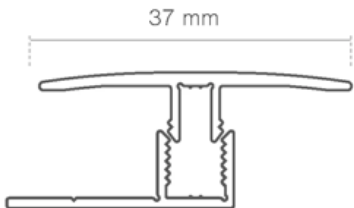

Sequoia® stair noses are manufactured from the same material as the flooring planks, ensuring a precise match in color and gloss. They deliver the same high level of durability and performance as the floor itself for a seamless, finished look.

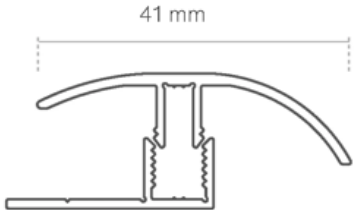

Other Moldings

Sequoia® moldings are 94.5" long and manufactured from durable aluminum for long-lasting performance. Unlike traditional MDF or plastic moldings, aluminum resists cracking, warping, and premature wear. Each molding includes an integrated base/track system, allowing the finished top piece to securely click into place for a clean, seamless installation.
